

HOMEMADE RAINBOW

I'm off to make a rainbow
From objects that I find
If you'd like to come along
I certainly won't mind

We're looking for the colors
That make up Roy G. Biv
But only out in nature
Is where these colors live

If we bring with us a backpack
To pack up all our finds
We'll complete our nature rainbows
Back home with creative minds

First we need some red
Pink will just not do
We need to find some red
In only a red hue

Let's look hard for orange
In a leaf or in a feather
I know that we can do this
If we keep working together

Yellow should be easier
If flowers are around
In pollen and dandelions
You'll find yellow on the ground

Now our task is easy
We're looking for some green
In grass in trees in moss in leaves
Impossible not to be seen

Things have gotten tricky
For now we look for blue
But it can't be in the sky
Because that can't come home with you

Indigo is tougher
It's a darker bluish shade
In a Bluejay or an Iris
Is where this shade is made

We made it down to violet
Purple in perfection
Once you have the color violet
Make a rainbow connection

Press them into clay
Use paper and glue
Nail them to some wood
Make a rainbow made by you
